

ClearBev Microfiltration Cartridges | CBE

Experience a new freedom in foodservice water treatment with ClearBev, an economical solution to filtration that does not compromise on quality or performance. The CBE series of cartridges is interchangeable with the legacy Everpure® products while meeting or exceeding their performance standards.

CBE cartridges are available in multiple combinations of filtration technologies, including sediment, chemical, taste, odor and scale reduction, with a variety of capacities, micron ratings, and quantities. All cartridges are made of recyclable plastic that is both high impact and high strength. These encapsulated filter cartridges also feature a quick-change connector for a sanitary, hassle-free installation and require no pre-activation.

These cartridges can be used in filtration systems either as a single cartridge encapsulated in a plastic housing or as a multi-stage filter system for high-flow equipment applications.

CBE cartridges should not be used with water that is microbiologically unsafe or of unknown quality without adequate disinfection before and/or after the filter.

FEATURES

- Economical solution to water filtration.
- Multiple combinations of sediment, taste, odor and scale reduction available.
- Made of high impact and high strength recyclable plastic.
- Quick-change connector enables sanitary, hassle-free installation.
- Requires no pre-activation.
